Timber ... ..	Nil	—	The forests of Cyprus cover an area of 700 square miles. They are situated on the two main ranges of mountains: (a) the southern range, extending across the south-western end of the Island, from Stavrovouni to Cape Acamas; and (b) the northern range, running from Cape Andreas to Cape Kormakiti. Except at the western end, where there are 15 square miles of forest, the forests on the northern range are confined to the hill tops.

## 3.—FISHERIES.

Catch of Fish			Number of boats and persons engaged in fishing	General Information regarding the industry and the possibilities of its Development
Kind of Fish	Quantity	Landed value	Number of boats engaged in fishing	<p>In the sea around Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman, few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats have certainly increased of late years there is still however plenty of room for improvement, possibly the employment of a drifter or trawler might lead to the development of this most important industry and an increase in production of a very valuable article of diet.</p> <p>The sponge fishing has since the year 1903 been entirely under the control of the Government but of course during recent years there has been a serious falling off owing to the war. The fishing in the past was principally carried on by men from the Greek Islands who arrived in the Island in the spring and fished through the summer, areas being allotted to them by the Inspector of Fisheries on payment of a fishing license and 20 or 25 per cent. of the catch (in kind) being also paid to Government.</p> <p>Thus :—</p> <p>Naked diving and Harpoons ... 20 per cent.</p> <p>Machine diving apparatus ... 25 „</p> <p>It is not anticipated that many will come in future as they prefer now other places.</p> <p>In 1921 three Cyprus boats only fished for sponges from May to July, the total catch being 77½ okes good sponges and 2½ okes skarta; of which the Government share was 15½ okes good and ½ oke skarta.</p>

(a) Some small factories are not included in this return.

(b) Primitive kilns, of which no details are available, are also found in certain localities.

(c) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books.

There are also a large number of primitive oil mills of which particulars are unobtainable. Few of these worked during the year.

## 7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

---

7.—A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Island during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Island.

---

Cyprus is essentially an agricultural rather than an industrial country. Development may be expected in the following industries (but except in mining no marked development has occurred in 1921), mining, wine and spirit making, fishing, fruit and vegetable drying or preserving, cotton, silk, gypsum, and industries connected with olive oil products. Animal breeding, especially of mules and donkeys is progressing.

Progress in mining has also been maintained at Skouriotissa, where material and plant to the approximate value of £25,000 has been imported for the mine, and whence 11,552 tons of cuprous pyrites has been extracted during the year. The extraction of asbestos at Amiandos has continued.

Among minor industries, bee keeping on modern methods is developing. The Cyprus bee is noted for its value in the apiary.

Activity has been shewn in the past, and especially in the last few years, in the Industry of Weaving. A great variety of Silk and Cotton fabric of excellent quality is manufactured notwithstanding the fact that their manufacture is conducted in a primitive method by the means of hand looms which are made locally.

Cotton fabric of various kinds, many of which compete with the European cashmeres, are woven in the looms and sold locally on a large scale for suits ; a large portion of them is exported.

The art of embroidering is also well advanced, a great number of women and girls are engaged on needlework.

No Government grants for the development of industries has been made during the year.

THESE QUESTIONS ARE TO BE FILLED UP IN RESPECT OF EACH PRISON IN THE ISLAND.

*Questions.*

*Answers.*

I. If the prison is on a separate system, is the separation complete? And, if not, what is the separation enforced by day and night respectively?

The Central Prison, Nicosia, is on the separate system, but prisoners are in association in the workshops.

In the District Prisons each prisoner is kept in a separate cell when there is room sufficient to allow of this, and they work in associated gangs during the day.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

By Warders and Sentries constantly patrolling the corridors and passages and inspecting the wards and cells where prisoners are confined.
